Glynwood’s mission is to ensure the Hudson Valley is a region defined by food, where farming thrives.

We work to advance regenerative agriculture that benefits the natural environment, energizes local economies, enhances human health and strengthens rural communities.

Our vision is a Hudson Valley defined by food: where farmers prosper, food entrepreneurs succeed, residents are nourished and visitors are inspired.
Environmental Resilience & Conservation
Regenerative agriculture conserves landscapes, promotes biological diversity and mitigates climate change.

Human Health
Food grown and raised with best soil-building and husbandry practices is fundamental for human health.

Regional Prosperity
Food production can be a powerful driver of economic prosperity.

Social & Cultural Vibrancy
A regional food system fosters a strong sense of place, brings people together, and increases social capital.
